

The CCCC has been a wonderful school for our child for almost two years. During his time here, he has learned so many important life skills, made wonderful friends and blossomed in his intellectual curiosity. He has had the opportunity to do so many enrichment activities, from art to cooking to gardening and observing nature and animals. The school also exposes the children to different experiences and environments by leading them on field trips to various neighborhood parks as well as to the Cable Car Museum and Filoli Gardens. We are particularly appreciative of the nurturing and knowledgeable teachers who care so much about his overall health, development and well-being and are true partners in supporting our child's development. We know that he will leave the CCCC well prepared for the next chapter in his academic career and we are so thankful to the wonderful staff and teachers at the CCCC for setting this strong foundation and instilling in him a lifelong love of learning.
